

WASHMONITOR™

Remote System Oversight, Alarms, Reports, Historical Data and Process Control

Wash Monitor delivers visibility - a window into the process. User defined sensor clusters acquire actionable data from priority wash processes and facility systems that impact quality, reliability, availability and security. Real-time conditions and events automatically report or alarm across the washpro™ network for display on various interfaces and management dashboards delivering contextual, localized, role-based information for better decision-making. We incorporate performance metrics, as well as the situational display of wash process information at the manager and enterprise level.

WASH MONITOR SYSTEM FROM CMI PROVIDES THE ABILITY TO:

- View facility-wide operational-centric data
- Capture, store and retrieve critical operational data with operator notes
- View data in real-time from “live” data or historical sources
- Provide high system availability and data integrity
- Preemptive alarm notification of operations and maintenance staff via various message formats
- Produce operational reports on regular intervals
- Provide system-wide administration of security and log-on

- Washpro™ Ethernet/IP network enables office and wash facilities to be networked.
- Scalable and modular to custom fit one location or a chain
- Allows predictive maintenance based on asset condition
- Acquires and displays actionable data to increase uptime, reliability, and efficiency

Our supervisory interface allows comprehensive monitoring and control of your entire store network for car wash and facility process control. Architected for reliability and flexibility, Wash Monitor is a client/server architecture with redundant I/O and local servers combined with centralized security.

We specialize in Car Wash data collection systems for process monitoring and quality control by integrating third party software solutions from Rockwell Automation and others. Our extensive experience allows us to develop custom solutions to meet your specific process control, quality assurance, reliability and availability needs.

We also develop and implement systems to monitor and manage building facilities, equipment systems and energy usage for HVAC systems, compressors, coolers, lighting and other high energy consumption or critical processes equipment.

Car Wash Management Integrators

a systems integrator of Rockwell Automation and other industry-leading companies

At CMI, we help our clients run their car wash business to maximum advantage. It is that simple.

No single organization can or does command all the relevant technologies ... to remain flexible, timely, and in the forefront, we rely on partnerships. We bring together the best and brightest thought leaders in the car wash industry and marry them with world class automation engineers and software developers.

Our solutions integrate unique industry and automation experience into a comprehensive Information and Control Network "Back Bone" for Retail Car Washes that include implementation and after market service strategies.

Share our vision for car washing and realize your goals for the future.

Partnered with Industry Leaders
Our extensive working relationships and partner- ships ensure our clients' interoperability and competitiveness providing them with powerful technology and

the highest-quality and most reliable products and services available, ultimately maximizing their business results.

Rockwell Automation is a leading global provider of industrial automation power, control and information solutions. The company helps customers across a wide range of end markets achieve a competitive advantage in their businesses through leading technologies and a comprehensive portfolio of products, software and services.

*CMI is a system
integrator of Rockwell
Automation software
and Allen Bradley
hardware*

As a full-spectrum automation provider, Rockwell automation offers a comprehensive approach to meeting your sustainability objectives in all facets of your operations. Our approach is specifically designed to help you turn sustainability challenges into business advantages.
